759 WEATHERPROOF ENCLOSURE KIT

Description

The 759 Enclosure Kit provides an optional weatherproof enclosure for the Hoffman Controls 759-ECM Variable Speed Evaporator Fan Controller that *Optimizes Energy Savings* in commerical refrigration systems.

The Kit includes a mountable black plastic box bottom with a clear plastic cover for Controller visibility, two cable glands, weatherproof gasket and hardware for desired Cooler/Freezer or outdoor 759-ECM Controller mounting installations.

When the 759 Enclosure Kit, Transformer Kit and the ECM Motor Kit are used with the 759-ECM Variable Speed Controller a *Remarkable 63%* or more *Energy Savings* can be achieved in all weather conditions.

Application & Installation

The 759-ECM Variable Speed Evaporator Controller system can be used with new or existing equipment, can be used with mechanical or electronic expansion valves, is not refrigerant specific and can be applied to a wide range of walk in and reach in Coolers and Freezers.

When selecting a mounting location for the 759-ECM Controller, the 759 Enclosure Kit should be consider for any cooler, freezer or outdoor installation. The Enclosure Kit is required for installations where direct moisture may be present.

Determine a mounting location on the evaporator itself or an interior or exterior wall that is near the evaporator. Remove the clear plastic cover and use the four #8-18 x 1" self tapping screws to mount the black plastic box to the chosen location. Install the two cable glands and place the 759 Controller on the four mounting studs in the box. Secure the board with the four #6-32 nuts. Do not remove the white plastic spacers from the circuit board. Once wiring and system check out are complete, install the rubber gasket on the clear cover and secure the cover with the four corner screws as shown below.

Specifications

Dimensions (L x W x H)	9" x 7.5" x 2 3/4"
Mounting	Four #8-18 x 1" self tapping screws
